SUMMARY

Full-Stack Software Engineer with 3+ years of production experience building scalable web and mobile applications. Built and shipped features end-to-end, from direct client collaboration to production deployment, across supply chain and e-commerce platforms. Proficient in the MERN stack, React Native, and modern cloud tooling, with strong instincts for performance, usability, and system reliability.

EDUCATION

Stevens Institute of Technology

Master of Science in Computer Science | Hoboken, NJ

Jan 2025 – Present

BMS Institute of Technology and Management

Bachelor of Engineering in Electronics and Communication | Bengaluru, India

Jul 2017 – Aug 2021

PROFESSIONAL EXPERIENCE

TechVibrant

Jun 2021 – Nov 2024 Bengaluru, India

Software Engineer | Promoted from Software Developer

Mar 2022 – Nov 2024

- Engineered full-stack web applications using **React, Node.js, and MongoDB**, supporting real-time inventory tracking and automated procurement workflows for internal business teams.
- Reduced **API response times by 35%+** through backend refactoring, query optimization, strategic indexing, and elimination of redundant calls, improving system reliability under high traffic.
- Led end-to-end design and delivery of a **React Flow-based workflow visualization**, working directly with clients to translate business requirements into a production-critical feature.
- Modernized cross-platform mobile apps using **React Native and Redux**, delivering production-ready iOS and Android builds on aggressive timelines.

Software Developer

Jun 2021 – Feb 2023

- Built core frontend modules for a supply chain platform, including **vendor, buyer, and order management pages** using React, directly supporting business operations.
- Contributed to **Shopify e-commerce** projects and an **HR & Payroll system** using React, Redux Toolkit, Formik, and Yup, handling frontend development and backend integrations.

PROJECTS

KindleAI – AI-Powered E-Reader Platform | React · Node.js · Socket.io · Docker · Redis · Firebase · Qdrant · Meilisearch

- Architected a **containerized full-stack e-reader platform** using Docker, orchestrating Firebase Auth, Redis for session/progress persistence, and Meilisearch for high-speed full-text indexing.
- Built an **AI Hover Chatbot** using Retrieval-Augmented Generation (RAG) with a Qdrant vector database and **multi-modal Listen Mode** via the Web Speech API for enhanced accessibility.

Patient Portal – Healthcare Mobile Platform | React Native · Node.js · Express · MongoDB · REST API

- Built a **full-stack healthcare platform** with role-based access for patients, providers, and admins, featuring end-to-end encrypted messaging, appointment scheduling, and health tracking.
- Developed RESTful APIs using **Node.js and Express** with a MongoDB backend, iteratively delivering features to replace non-real-time healthcare workflows.

BreatheWatch – Air Quality Visualization App | JavaScript · Node.js · Express · MongoDB · Handlebars

- Built a data-driven web app using **NYC Open Data** to visualize neighborhood air quality with borough-level heatmaps, location search, and comparison.
- Implemented secure server-side rendering with **session-based auth, input validation, and XSS protection** for reliable data access.

TECHNICAL SKILLS

Languages: JavaScript, Java, SQL, HTML, CSS, Spring Boot

Frameworks & Libraries: React, Node.js, Express, Redux, React Native, Socket.io, Bootstrap, Handlebars

Databases & Tools: MongoDB, MySQL, Redis, Qdrant, Meilisearch, Sequelize, Docker, Git, AWS, Firebase, Postman, Azure TFS

Concepts: REST APIs, RAG, MVC, Role-Based Access, Real-Time Systems, Agile/Scrum, XSS Protection

CERTIFICATIONS

Full Stack Web Development | Masai School, 2021

Introduction to Spring Boot | 2020
